About Sound Weaves

Hand-drawn lines play against a flat color ground to simulate weaving. Mechanical lines and spaces create the exotic beat of sound waves. Half-circles in half-square triangles evoke light and color reflections on the water.

Playing off the desire to say “sound waves” the three color groups were chosen to evoke the China Sea (green/red/black), the Mediterranean Sea (blue/yellow/white) and the romantic Caribbean. (turquoise and lime citrus). — *Lonni Rossi*
